

Digital Carbon Monoxide Alarm

Product Features

- LCD screen display
- Visual warning of CO levels
- Peak level CO recorded
- Bar graph illustrating current risk
- Digital room thermometer

Used by 98% of UK fire brigades
New extended 7 year battery life

Carbon monoxide (CO) is a silent killer; with no smell or evidence it can lead to unconsciousness, brain damage and even death. Carbon monoxide can be a result of a faulty appliance, a blocked flue system, or incomplete combustion

The revised Document J Building Regulation (October 2010), suggests that a CO alarm should be installed for every fixed wood, solid fuel and biomass appliance.
