

Chimney Mirrors

Product Features

- Glass mirror plates
- Ability to pan and tilt
- Aluminium frame for protection
- Easy to replace glass
- Telescopic handle, extendable from 15cm to 100cm

Polished crystal mirror allows for excellent optical control of exhaust and flue systems

A great tool for any flue or biomass installer; allows you to see parts of an installed system which are normally hard to reach. With its wide range of sizes and telescopic function the mirror is both flexible and reliable. Manufactured from quality materials leading to a long lasting and durable product.

Product Code:
