

Chimney Cleaning Log

Product Features

- Tested by OMNI-test laboratories for its chimney cleaning capabilities
- Free insurance with the leading insurance group in Europe

Use every 60 fires or as needed

No mess. No tools. No hassle. No chimney fires

Independent test results demonstrate that using this product reduces creosote deposits in wood burning stoves and flues. When used in a fireplace it renders the creosote more brittle and lowers the volatile organic compounds in the chimney.

Subsequent mechanical sweepings are easier, cleaner and more effective. Whether using an open fire, wood or multi-fuel stove, or a brick, lined or stainless steel twin wall chimney, a chimney cleaning log will help to prevent chimney fires. They even insure you and your home against it.

Product Code: CCL

N.B. Does not take the place of inspection and professional cleaning by qualified chimney sweep
