

# Carbon Monoxide Alarm

## Product Features

- Emits at 58dB at 1 metre away
- Test and reset button
- 10 year battery life
- Automatic self-diagnostics

Used by 98% of UK fire brigades  
New extended 10 year battery life

Carbon monoxide (CO) is a silent killer. With no smell or evidence it can lead to unconsciousness, brain damage and even death. Carbon monoxide can be a result of a faulty appliance, a blocked flue system, or incomplete combustion

The revised Document J Building Regulation (October 2010), suggests that a CO alarm should be installed for every fixed wood, solid fuel and biomass appliance.
