

## Chimney Data Plate

### Product Features

- Easy to mount
- Simple way of detailing and recording installations
- Manufactured from durable and long lasting steel

## HETAS requires all installations to have a fitted and complete chimney data plate

The chimney data plate is a must have product for any flue or biomass installer. HETAS states that a chimney data plate must be completed and fitted with any installation. The plate can be easily completed with the use of a permanent marker. A useful tool when returning to check / maintain an installation.
