

The Gainsborough Collection

The Devonshire

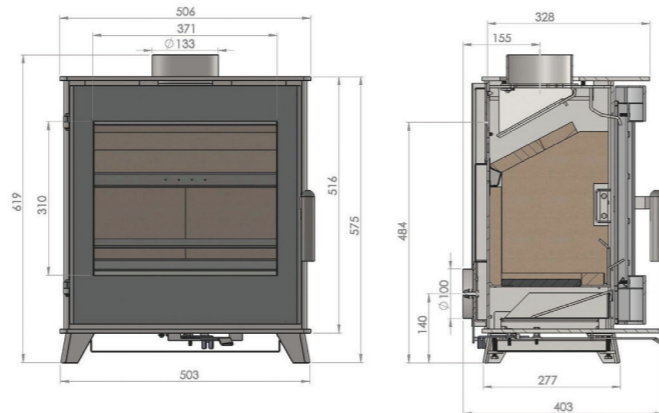

The Collection

Like history's finest landscapes and portraits, this collection of wood burning stoves serves to enhance the most elegant period houses and to grace the finest contemporary architecture.

As well as creating an enticing focal point in any room, both stoves provide discerning, responsible homeowners with highly efficient and environmentally sensitive warmth. Their appearance and engineering set the standard for those who appreciate both form and function. As importantly, both meet today's emission standards.

The Devonshire

The Devonshire is the larger of the two designs. At more than half a meter wide, it provides the scale required for rooms that benefit from generous proportions. Output: 4.9kW.

The Gilcar

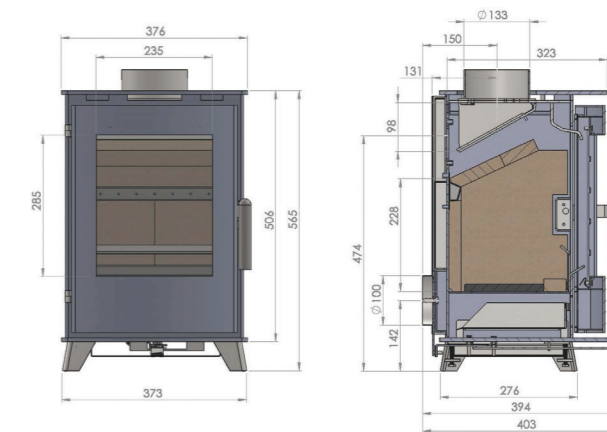

Accreditations

- HETAS approved product
- SiA ecodesign ready
- Defra Exempt for use in smokeless zones
- CE and EN13240 approved
- Energy Efficiency: A+

The Gilcar

The Gilcar is the slimmer option, and a little lower in height. It is designed to fit neatly and stylishly into most fireplaces, or for more convenient positioning in smaller spaces. Output: 4.5kW.
